Deadlines:

DL1: OCT 04, 2021 – Essay submission

DL2: OCT 08, 2021 – Essay acceptance

DL3: OCT 15, 2021 – Registration and payment of the course fee

This PhD course is jointly organized by the Grounded Theory Institute in California and the Theory Building Research Programme. It is a generic course that aims to acquaint PhD candidates with the methodology of the classic grounded theory.

The course targets the applicants who either plan to do a Grounded Theory PhD or are already doing one and shall be prepared to present their future plans or the data they have already created. To start the application process, please go to application section on the course website.

By the end of the course, the PhD candidates will have gained knowledge, skills and competences in (a) designing (classic) grounded theory methodology, and (b) implementing (classic) grounded theory methodology.

Participation fee is 300 EUR to cover course related activities (the fee applies to all applicants). Each participant is responsible for his/her own travel and accommodation.

The delegates will have the opportunity to meet three distinguished GT scholars and practitioners who are invited as guest lecturers: Dr. Andy Lowe of Grounded Theory Institute in California; Dr. Wendy Guthrie, researcher and clinical hypnotherapist, UK, and Dr. Michal Lysek, Senior Development Engineer at HMS Industrial Networks, Sweden. The course faculty includes Prof Romeo V. Turcan of Aalborg University who also is the course coordinator.

Any queries about application, registration and administration, please contact the PhD Course Secretary, Michael K. Simonsen.
