## Tuesday, May 24

### 9:00 – 16:00 WP3 development

EU partner teams and MD teams will work together at each university's premises on WP3. The activities will last for three days from Tue through Thu. The objectives of these intensive working sessions are to:

- Draft study programs (incl., semester descriptions and learning outcomes; students centered active learning, PBL/assumptions; structure of the programs, e.g., module based; evaluation methods)
- Identify needs for structural change: (1) system, (2) university, (3) study program levels
- Identify needs for content change: study program level
- Draft road maps

To achieve the above objectives the following approach is suggested: take a clean piece of paper and design a study program as if you have all resources and freedom available. The roadmaps will outline the strategy of how to get there.

Each Study Program Team is free to develop its own agenda and work plan for these three days. It is suggested an hour activity to take place e.g., on Tuesday morning: EU project partners will present PBL/active learning methods (in a specific area of studies) to a wider audience.
