## 15th of October: Panel session

### THE PHD SUPERVISOR? – COACH – MENTOR – LEADER FOR TOMORROW'S WORLD?

Traditionally the PhD was an apprenticeship for a single career – the academic. This still tends to be a dominant model. Growth in the number of PhD candidates, older candidates working full time, the wider needs of society for high-level skills in all occupations prompt the question – are PhDs fit for purpose? What high level competences should society expect from doctoral graduates?

Wider doctoral personal development and skills training needs are a challenge for supervisors. The panel will explore these 'leadership' challenges from different perspectives such as practitioner, pracademic, supervisor, doctoral graduate, PhD candidate.

Participants will contribute to the discussion.
